Driving Change Through Data

Theatre Complete
Managing The Location And Status Of Reusable Surgical Devices For Theatres

Theatre Complete enables:

- ✔ Logistical pick up planning
- ✔ Fast track pick up and turnaround of priority items
- ✔ Reduction in hire charges due to faster return of loan items
- ✔ Reduction of bottle necks in SSD dirty returns
- ✔ Less storage of contaminated waste in theatre sluice areas

Lack of visibility on RIMD status leads to:

- ✔ Cancelled procedures
- ✔ Increased stock levels
- ✔ Reprocessing bottle necks
- ✔ Increased inventory

Instantly Visible

Theatre Complete enables departmental staff to view the availability and status of theatre equipment simply by a click of a button. In order to drive increased efficiency and instrument availability, it is critical that each department knows the whereabouts and status of Reusable Medical Devices at all stages of use.
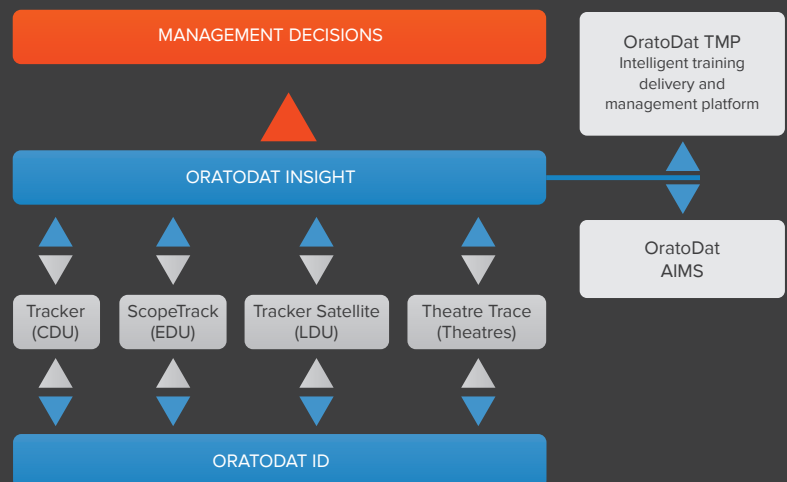

Enabling this function has the potential to help streamline department processes by allowing to sort through equipment in various different ways such as items for reprocessing. Once a procedure has been signed off, all equipment used will be available on Theatre Complete with a date stamp, location, item information and latest patient information.

Your Theatre Complete enabled Dirty Returns module can view all items ready for pickup ensuring fast turnaround of medical device inventory.

Intelligent equipment lifecycle management for healthcare providers

Improve your department's compliance and efficiency with our OratoDat-enabled software solutions, available for:

- ❯ Endoscopy reprocessing units
- ❯ Multi-site reprocessing
- ❯ Theatres
- ❯ Local clinics and dentists
